

MONTANA BLACK SPIDER 150ML

Now integrated in the famous Montana BLACK Series. Create your own spider-web like effects with the Montana Spider's high pressure out put. Excellent for calligraphic techniques, use the standard cap for broad spider web like marks or swap it for a skinny cap and create rough pencil thin lines for rendering or dribbling effects. Available in effect color black.

PRODUCT INFORMATION "MONTANA BLACK SPIDER 150ML"

Lacquer Base	Nitro Combi
Valve System	High-Pressure
Content	150ml

The Montana Black Spider 150ml is the original spider effect can. Originating from the auto industry, this easy to hold 150ml can creates impressive black spider web-like effects through its high-pressure output. The closer it's applied to the substrate, the tighter the web lines. The further away, the more organic the effect becomes. Often used for calligraphy techniques, the line output can also become sketchy and pencil-like when the original FLAT JET WIDE CAP is replaced by a SKINNY CAP or NEEDLE CAP (as found in the Montana Cap range).
