400.ML

White pigmented chalk spray paint. **CHALK DUST:** Some chalk dust will be created when spraying. It can irritate eyes and respiratory surfaces, especially when used indoors. Temporary only on non-porous surfaces. Use only on porous surfaces. Varnishing the CHALKSPRAY with Montana VARNISH will bond and seal the spray. Use a brush and water or use a pressurized water cleaner. **TEMPORARY MARKING:** When used outdoors on non-porous surfaces, visibility and longevity of the application are affected by weather conditions. Wind, rain, snow, frost, rain, sun light and traffic will accelerate the desaturation process. Visibility may be reduced. Remove the black safety ring under the nozzle. Test spray. After use the can should be put into the recycling skip or appropriate container for reusable cans. For optimal lifespan, store cans always with the nozzle on.

EXTREME DANGER! EXTREMELY FLAMMABLE. CONTENTS UNDER PRESSURE. May ignite explosively. Vapors can cause narcotic effects such as drowsiness, loss of coordination, and loss of consciousness. Do not use in confined spaces. Avoid use by children. Contains material which may cause adverse liver effects. Contains material which may cause cancer. **KEEP OUT OF REACH OF CHILDREN.** Carbon Black (in color shade Black), Titanium dioxide (in color shade White, black and grey). Avoid contact with eyes, skin and clothing. Avoid breathing mist. Always wear appropriate personal safety glasses or goggles. Wash thoroughly after handling. Do not puncture or burn. Do not expose to temperatures above 120°F. Exposure to heat, ignition sources or sunlight may cause explosion. Store away from heat, sparks, and open flame. Do not smoke, weld, or use electric, motor, and other sources of ignition during use and until all vapors are completely dissipated. Do NOT inhale fumes. In case of skin contact, wash thoroughly with water and soap. In case of eye contact, flush with running water for at least 15 minutes. Call a physician. If breathed in, move to fresh air. **WARNING:** This product contains a chemical or chemicals known to the state of California to cause cancer. See the manufacturer's Safety Data Sheet (SDS) for this product. Should the product be used in the workplace, consult the manufacturer: MOTTI (DUPLI GmbH - Kurt-Vogelsang-Str.6 - 74835 Haselmerberg, Germany) **EMERGENCY PHONE:** Domestic North America: 800-424-6300

PRODUCT INFORMATION "MONTANA CHALK 400ML"

Color Shades	10
Gloss Level	Matte
Valve System	Low-Pressure
Lacquer Base	Chalk
Content	400ml

The CHALKSPRAY is a pigmented chalk paint that is ideal for outdoor marking (temporary only on non porous surfaces). Available in 10 powerful color shades that are deep matte and high covering. Montana CHALKSPRAY can be applied on various surfaces. Depending on weather conditions and climate outdoor marking lasts between several weeks to several months. It fades faster during extended periods of rain or in high traffic areas. On non-porous surfaces like glass or metal the pigments can be removed. Removal from porous surfaces might be difficult. Trial application and removal on a non-visible section of substrate is recommend when working on a non-porous surface. Montana CHALKSPRAY impresses by its feel and look - the typical rough chalk effect.

CHALK has very special aesthetics - and Montana CHALKSPRAY brings those aesthetics into a spray that works on many surfaces!

Depending on weather conditions and climate outdoor marking lasts between several weeks to several months. Montana CHALKSPRAY works also well on canvas, cardboard or other primed grounds due to its great coverage. The CHALKSPRAY will become permanent when sealed with Varnish (when used on a canvas i.e.). It also allows further application by brush, scraper or other tools. For clean and precise lines we recommend to use Montana Level caps 3 to 6 (3 and 4 for fine and medium lines, 5 and 6 for wide lines and filling large areas). **Application Note:** Some chalk dust will be created when spraying. Wear a respirator mask to avoid inhaling chalk dust or pigments. It is recommended to cover surrounding objects and surfaces well. **For Removal:** Outdoors: Scrub vigorously with a brush and water or use a pressurized water cleaner. We suggest trialing on a non visible area of your surface first to check the ease of removal.
