

PRODUCT INFORMATION "MONTANA CHALK 400ML"

Color Shades	10
Gloss Level	Matte
Valve System	Low-Pressure
Lacquer Base	Chalk
Content	400ml

The CHALKSPRAY is a pigmented chalk paint that is ideal for outdoor marking (temporary only on non porous surfaces). Available in 10 powerful color shades that are deep matte and high covering. Montana CHALKSPRAY can be applied on various surfaces. Depending on weather conditions and climate outdoor marking lasts between several weeks to several months. It fades faster during extended periods of rain or in high traffic areas. On non-porous surfaces like glass or metal the pigments can be removed. Removal from porous surfaces might be difficult. Trial application and removal on a non-visible section of substrate is recommend when working on a non-porous surface. Montana CHALKSPRAY impresses by its feel and look - the typical rough chalk effect.

CHALK has very special aesthetics - and Montana CHALKSPRAY brings those aesthetics into a spray that works on many surfaces!

Depending on weather conditions and climate outdoor marking lasts between several weeks to several months. Montana CHALKSPRAY works also well on canvas, cardboard or other primed grounds due to its great coverage. The CHALKSPRAY will become permanent when sealed with Varnish (when used on a canvas i.e.). It also allows further application by brush, scraper or other tools. For clean and precise lines we recommend to use Montana Level caps 3 to 6 (3 and 4 for fine and medium lines, 5 and 6 for wide lines and filling large areas). **Application Note:** Some chalk dust will be created when spraying. Wear a respirator mask to avoid inhaling chalk dust or pigments. It is recommended to cover surrounding objects and surfaces well. **For Removal:** Outdoors: Scrub vigorously with a brush and water or use a pressurized water cleaner. We suggest trialing on a non visible area of your surface first to check the ease of removal.
