

PRODUCT INFORMATION "MONTANA GOLD 400ML – COLORS"

Color Shades	214
Lacquer Base	NC-Acrylic
Gloss Level	Semi Gloss
Valve System	Low-Pressure
Content	400ml

THE PERFECT TOOL FOR CREATIVE WORK

Montana GOLD color pallet Update – **7 new warm grey tones available: Dolomite, Ceramic, Buzzard, Yosemite, Asphalt, Meteorite and Basalt.**

Montana GOLD is the perfect tool for all artists and creative workers. The specially developed Low-pressure system guarantees maximum accuracy to meet the highest requirements while giving professional results! High-covering and quick-drying acrylic lacquer. Montana GOLD allows for a new level of ease and control when painting with spray cans, with no cracking or color bleaching. The Montana GOLD color system has been completely overhauled and optimized by our dedicated team of artists and laboratory experts to make it perfect. With 200 matt acrylic colors, 2 metallic, 3 effect colors and 9 transparent colors possibilities, Montana GOLD offers one of the largest and most concise color range available in spray paint. Montana GOLD can be applied on canvas, wood, concrete, metal, glass or even flexible surfaces.

LOW PRESSURE & HANDLING:

The low pressure system allows perfect handling. The level of control that can be achieved with this can has never existed before. The Montana Level Caps were precisely developed for the low pressure system allowing the most even and clean lines with the highest efficiency and accuracy. Spray widths from 0,4cm up to 25cm can be achieved depending on the users skill and experience. For perfect results we recommend the LEVEL Cap System in combination with Montana GOLD.

COLOR SYSTEM

The Montana GOLD color system has been completely overhauled and optimized by artist's and laboratory experts to make it perfect. Some existing colors have been replaced and improved, while new colors have been added to optimize color values and achieve a flowing color range.

SHOCK colors: For some consumers "less is more". So to avoid being overwhelmed the Montana GOLD Shock range was developed as a mini Montana GOLD assortment with the only the most high covering colors within these color scales chosen. This system became so popular that it also extended to some of the water based Montana ACRYLIC ink markers and refills making possible to use strong opaque colors in more mediums.

CLASSIC colors: Back in the days before manufacturers created high opacity spray paint for the specific use of graffiti art or Urban art, there were a few "classic" colors that were the preference of many street based artists. Normally chosen for their opacity or color impact, the Montana GOLD line has adopted a special place within

the color range for these historical colors.

PROCESS colors: Inspired by the CMY color properties used in the printing industry, the CMY colors are powerful colors bound to draw attention to what ever they are applied on.

FLUORESCENT colors: famous for being able to glow under UV light. This is no exception with the Montana GOLD Fluorescent range. For best results we recommend fluorescent colors to be applied to pre-primed, dry white surfaces (e.g. Shock White i.e.). This will increase luminosity and improve coverage. Applying Montana GOLD clear coats will offer greater UV protection however may hinder the fluorescent effect slightly. In general fluorescent colors are less lightfast and not resistant to the elements. They are not abrasion proof like other Montana GOLD color shades.

CHROME EFFECT colors are achieved by having the metallic pigment particles located on the surface of the object you are spraying. This is achieved by the lacquer remaining "open" so that light can shine and reflect off these particles. However this results in chrome effect cans being less weather resistant and not abrasion proof. Finger marks may occur if handling chrome effect sprayed items. Applying Montana GOLD clear coats make the paint appear less shiny and prevent it from reflecting light as efficiently as prior to the clear coat application.

TRANSPARENT colors: The Montana GOLD range now has 10 new transparent color shades to compliment the existing Transparent Black and Transparent White. The new shades enable users to achieve greater visual depth and tonal variation. Also perfect in combination with colors close to the transparent tone, to achieve simple or complex gradient shifts and give dimension. Apply thinly or in multiple layers for perfect fading or shadows.
