The Montana BLACK series is renowned amongst many things for its excellent coverage. The INFRA colors, which are the fluorescent range within the Montana BLACK series are no exception. The INFRA series is offered in the colors INFRA Yellow, Orange, Red, Pink, Violet and Green so you can extend your creativity into new realms. Whether it be a highlight here and there or use over larger surface area, the INFRA range can make the difference your looking for.

Please note that all fluorescent colors in general regardless of which origin derive of synthetic man made pigments. As such there is no natural resistance to UV exposure, thus lifespan and durability against the elements is less than that of normal colors.

## LACQUER AND VALVE NITRO-COMBINATION BASE

The Montana BLACK contains fast painting and layering optimized Nitro-Combination lacquer. The matte finish colors are fast drying and high covering. Only high quality ingredients and best pigments have been used for the development and production of the new Montana BLACK, assuring the highest standard of quality.

## HIGH-PRESSURE

The high-pressure system allows for fast and perfect handling. Due to the high output of paint and the high pigment load Montana BLACK covers extremely well. In conjunction with the use of Montana spray caps, Montana BLACK enables users to apply the paint to large or small surface areas with accuracy and efficiency. Spray widths from 1cm to 30cm can be achieved depending on the user skill and experience.

## 100% WINTERPROOF

Functions reliably in extremely cold conditions. Perfect for artists working outside in cold climates. Praised by artists around the world, Montana BLACK has proved to be the all weather rugged and reliable tool.
