

PRODUCT INFORMATION "BLACK ARTIST EDITION NYCHOS"

There isn't an artist in the world we would rather have had design the can for our BLK 4230 „Kidney“.

Combining Nychos and his anatomically inclined designs to this organ-inspired color was a predestined match. True to the age old saying „no guts, no glory“, the Vienna-based artist creates a fusion between a comic character and the anatomic functions of the body. Growing up in an Austrian family with a fondness for hunting, his early confrontation with the anatomy of dead animals sparked his interest in the science of anatomy and dissection. This fascination and his personal, hands-on experience with the intensely realistic colors of anatomy are strongly reflected in his artworks. The true-to-life interpretation of dissected motifs in conjunction with said intense color schemes are regarded as Nychos' trademark. This unique signature style was exactly what we had in mind for this BLACK artist edition collaboration, and of course, Nychos exceeded our expectations: The can is embellished with all the guts and glory that any kidney could have ever hoped for.
