## PRODUCT INFORMATION "BLACK ARTIST EDITION NAWAS"

The Montana BLACK Artist Edition series has been celebrating top class graffiti artist and their work since its inception. For the 8<sup>th</sup> installment in the series we have upped the ante by not just featuring the talents of one artist, but that of a whole crew in collaboration! We are proud to present NAWAS crew (Night Watchmen) from Belgium to the series with their newly re-named "NAWACID" can, which normally goes under the alias of Acid BLK 6005. NAWAS are well known for adding their touch to the appearance of a normally bland Belgian public transport system. Although their creative touch adds a new, humorous presentation of often familiar symbols and graffiti iconography. With a touch of politics and a dabble of irony, the Night Watchmen are a valued part of the European writing community. Get your NAWACID while stock lasts.
