The Montana BOLD Marker 15mm contains 20ml of a super deep and high covering black BOLD ULTRA INK, that is made of a low-viscosity, alcohol-based formula.

# PRODUCT INFORMATION "MONTANA BOLD MARKER 15MM STANDARD"

This Montana BOLD Marker 15mm Standard comes in a sturdy built-to-last aluminum body with a nicely designed timeless BOLD branding. Equipped with a 15mm standard tip, this BOLD marker is refillable and the 15mm felt tip is replaceable. The Montana BOLD Marker 15mm contains 20ml of a super deep and high covering black BOLD ULTRA INK, that is made of a low-viscosity, alcohol-based formula. Montana BOLD ULTRA INK is weather and UV resistant, making it a real "made to stay" formula. The luscious, semi gloss finish ULTRA INK, can be applied to almost any surfaces. The ink is delivered through the markers felt tip by a refillable, pump system valve, that works perfectly with extremely low-viscosity inks, offering exceptional flow, especially on non porous surfaces like metal, glass or plastics. Montana BOLD ULTRA INK is permanent and highly abrasion proof, resulting in extraordinary high coverage and super quick drying time. The Montana BOLD ULTRA INK is deep, rich Black color, great for Tagging and Street Marking though it's a very low-viscosity ink so you'll better wear gloves when hitting the streets!

## **15mm Standard Tip Size**

The name "standard", has its origins from being the standard tip size for large tip markers, long before the graffiti community welcomed the use of this style of marker out in the field. With a chisel shape, the durable 15mm synthetic felt tip allows marks that can be made ad hoc, extending the flow and creative desires of its user, or with the calligraphic precision of a Japanese calligraphy artist. The flow control pump action valve gives users the opportunity to release or decrease the amount of ink flowing through the 15mm Standard tip. The Montana BOLD 15mm Standard is the work horse of marker sizes, filled with the much sort after alcohol based, optimized, deep black, ULTRA INK, certified with ASTM-D4236 Standard.

## **Other Montana BOLD products**

The Montana BOLD Marker is also available as 8mm Round tip, a 10mm Chisel tip and a thinner 3mm Chisel tip Marker. Montana The BOLD ULTRA INK Refill 200ml is the perfect match to this series of Markers. Montana BOLD – a classic high quality Montana Marker containing highest quality Ink, all made in Germany.
