The Flat Jet spray caps offer an extremely clean and even spray coating allowing smooth application thus maximising paint, clear coat and effect coating characteristics.

PRODUCT INFORMATION "MONTANA DIY CAP SET"

The Montana Cans DIY Cap Set is not only ideal for covering surface area efficiently, it is also perfect for those projects where a seamless finish matters. The Set is a hang sell pack of six caps, featuring three Flat Jet-Medium spray caps and three Flat Jet- Wide spray caps. The Flat Jet spray caps offer an extremely clean and even spray coating allowing smooth application thus maximising paint, clear coat and effect coating characteristics. Excellent for getting in those hard to reach places, the DIY Cap Set can not only be used for practical applications like painting objects or surface sealing, it can also be utilized for creative applications like calligraphy, or large scale mark making. The turnable spray dot makes variations of vertical and horizontal lines possible. Application to small or large surfaces is a breeze at the optimal spray distance of 15-25cm from the substrate. The Flat Jet Medium will spray a 6 -8cm wide line and the Flat Jet Wide will spray a 10 – 14cm wide line, making any DIY project a „can do“ project.

When a seamless finish matters or if you're just experimenting with a new DIY project, the Montana DIY CAP SET has the cap for you. The convenient hang sell pack is compiled of six caps. Three of them are FLAT JET Medium caps and three are FLAT JET Wide caps. Well know as the DIY cap series of choice, the FLAT JET cap series emit extremely clean and even spray output that results in smooth application. Not only does this enable users to cover surface area efficiently, but it also optimizes paint, clear coat and effect coating characteristics. Due to their ability to get into those hard to reach areas, the DIY CAP SET is the perfect cap set for painting objects and for sealing surfaces. With practicality covered, if your project is more artistic or creative, the FLAT JET caps are exceptional for graffiti, urban art or street art applications like calligraphy, large-scale mark making and surface area filling. The turn-able spray dot makes changing from vertical to horizontal line work a breeze. For the best results spray at a distance of 15cm to 25cm away from your substrate, preferably in an area with no cross wind. The FLAT JET Medium cap will spray between 6cm to 8cm in width. The FLAT JET Wide can spray between 10cm to 14cm in width. The Montana DIY CAP SET makes any creative project a "can do" project.
